

UFO Sightings Metadata

COLUMNS info:

- `datetime` - standardized date and time of sighting
- `city` - location of UFO sighting
- `state_province` - the US state or Canadian province, appears blank for other locations
- `country` - Country of UFO sighting
- `shape` - a one word description of the "spacecraft"
- `duration (seconds)` - standardized to seconds, length of the observation of the UFO
- `duration(hours/min)` - standatized to hours/minutes, length of the observation of the UFO
- `comments` - text description of the UFO encounter. Warning: column is messy, with some curation it could lend itself to some natural language processing and sentiment analysis.
- `date_posted`- when was the UFO sighting reported
- `latitude` - latitude
- `longitude` - longitude
